

Week 2, Lesson 2 Resources: Basic Data Types & Statements

The following resources were selected to provide an overview of the topic of Basic Data Types & Statements. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

Title of resource: [Solidity Frequently Asked Questions](#)

Resource type: website

Description: This website contains a list of frequently asked questions about Solidity.

Title of resource: [Types](#)

Resource type: website

Description: Solidity is a statically typed language, which means that the type of each variable (state and local) needs to be specified at compile-time. Solidity provides several elementary types which can be combined to form complex types.
