

Week 1, Lesson 4 Resources: Deploying Smart Contracts

The following resources were selected to provide an overview of the topic of Deploying Smart Contracts. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

Title of resource: [Ethereum, Tokens, and Smart Contracts](#)

Resource type: website

Description: This article details Ethereum, tokens, and smart contracts.

Title of resource: [Decoding the Enigma of Bitcoin Mining](#)

Resource type: website

Description: “Bitcoin miners” is somewhat a misleading term. The miners are actually “bookkeepers” and “validators” of the network. It is called as Mining because the algorithm somewhat approximates the declining supply of gold and the miner wins an award (which are the new bitcoins created) for their effort.
