

# Week 3, Lesson 2 Resources: Time Elements

The following resources were selected to provide an overview of the topic of Time Elements. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

**Title of resource:** [Enum](#)

Resource type: Website

Description: Enums are one way to create a user-defined type in Solidity.

**Title of resource:** [Time units](#)

Resource type: Website

Description: As you can see in the above link, Solidity in 0.4.0 and above equates 1 year to 365 days. Can you see how a definition like that could be a problem for leap years? Which is why, starting from Solidity 0.5.0, the use of years will be deprecated.
