

Week 2, Lesson 3 Resources: Specific Data Types

The following resources were selected to provide an overview of the topic of Smart Contract Specific Data Types. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

Title of resource: [Learning Solidity : Tutorial 6 Data Types \(Array, Mapping, Struct\)](#)

Resource type: video (20:14)

Description: This video details Solidity data types.

Title of resource: [Units and Globally Available Variables](#)

Resource type: website

Description: This website details the different units and globally available variables in Solidity.

Title of resource: [Solidity Tutorials](#)

Resource type: website

Description: Solidity is a high-level language whose syntax is similar to that of JavaScript and it is designed to compile to code for the Ethereum Virtual Machine.
